***Abstract:** The education system in each country is the basis for the improvement of human resources, which are a factor of strategic importance for the development of the economy and society. Agrosector is one of the important national chances for development, and the impact of changes on agro-economic science and education is significant. This requires the need to permanently innovate the expertise and knowledge of all actors in the agro-sector, through the establishment of a training and training system, as one of the priorities of economic and social development. The paper discusses theoretical basis of strategic change management with emphasis on the analysis of the implementation of strategic human resources management national level in the agrosector.*

***Key words:** education, agrosector, human resources, strategic management, training*
