*Summary: In the following topic, in addition to the many issues that make up the subject of the analysis, attention will be focused on our primary task to find an adequate answer to the questions; place, role and importance of education in the economies of the countries in this region, and in this regard, we give as valid a response as possible. "East Asian miracle".*

*Issue related to the implementation of the Bologna Declaration in Higher Education of the Republic of Serbia, Bosnia and Herzegovina, the countries of the region, the Western Balkans and other countries of Europe that joined in its implementation. More precisely, was the Bologna Declaration experienced its application in an educational sense or not? The third group of questions refers to the place and role as well as the consequences of the opening of private universities in these countries and the consequences for the education system that are caused by the quality of studies, programs, teaching staff that is a key factor in the educational process.*

*Key words: economy, education, reform, reorganization, education.*
